

URGENT NEWS FOR COVID 19 VACCINATIONS

Friday 7th January at the **Stamford Arts Centre**, 10am and 4pm, including boosters and first and second doses for anyone eligible including 12-15 year-olds provided a parent/guardian is present to consent.

Walk ins are also available every day 0830 to 1600 (to 1930 Thursdays) at Queensgate, Peterborough

Our vaccination teams at all sites are still here for you, have lots of vaccinations and appointments available, and would love to see you as soon as you can.

Don't get put off getting boosted for fear of side-effects, but in all honesty any side-effects tend to be mild and short-lived, in most cases only lasting a day or two. Remember, Omicron doesn't know or care what time of year it is, but it will take around a couple of weeks for your booster to kick in and protect you.

One thing that is becoming an issue nationally and in air area is the number of people who've made appointments for vaccinations and then simply not turned up, known as DNAs. **It is several hundreds per day!** Apart from urging people to come and get vaccinated as soon as possible, if you can't make your booked appointment, please cancel it so someone else can use it. You can rearrange/book a new appointment online via the National Booking System or by calling 119 – if you do this, once you have had your booster your original appointment will be automatically cancelled enabling someone else to use it. If you have an appointment arranged with your GP surgery, please contact them to cancel it if you don't need it/are going to rearrange.
